

SCMS

Users Group Meeting

July 15, 2008

Agenda

- Physical Media Migration
- SCMS Project Update
- Q & A
- Future User Group Topics
- Future User Group Meeting Dates

Physical Media Migration

Russ Ray

Physical Media Migration

Physical Tape to
Virtual Tape System

Physical Media Migration

Two Initiatives and
One “Best Practice”

Physical Media Migration

- Single Virtual Tape System
 - Virtual Tape System will replicate data between two campuses
- Closing of the Cannery Facility
 - Consolidating tape operations to the Gold Camp facility

Physical Media Migration

- Another Campus
 - Operational redundancy in another geographic area
 - Near fully automated
 - Automated Tape Libraries with robotics and the Virtual Tape System

Physical Media Migration

- Best Practice
 - Old tapes are subject to degradation and more susceptible to errors
 - Or complete loss of data

Physical Media Migration

- DTS' “best practice” approach is to copy the data to new media
 - Essentially refreshing the data

Physical Media Migration

- Not all data is worthy of copying
 - Obsolete data
 - Failed processes
 - Kept forever, but who knows why?

Physical Media Migration

- Tapes Stored Offsite
 - Move to other “newer” physical media
 - Other technologies
 - Secure FTP

Physical Media Migration

Good Progress

Physical Media Migration

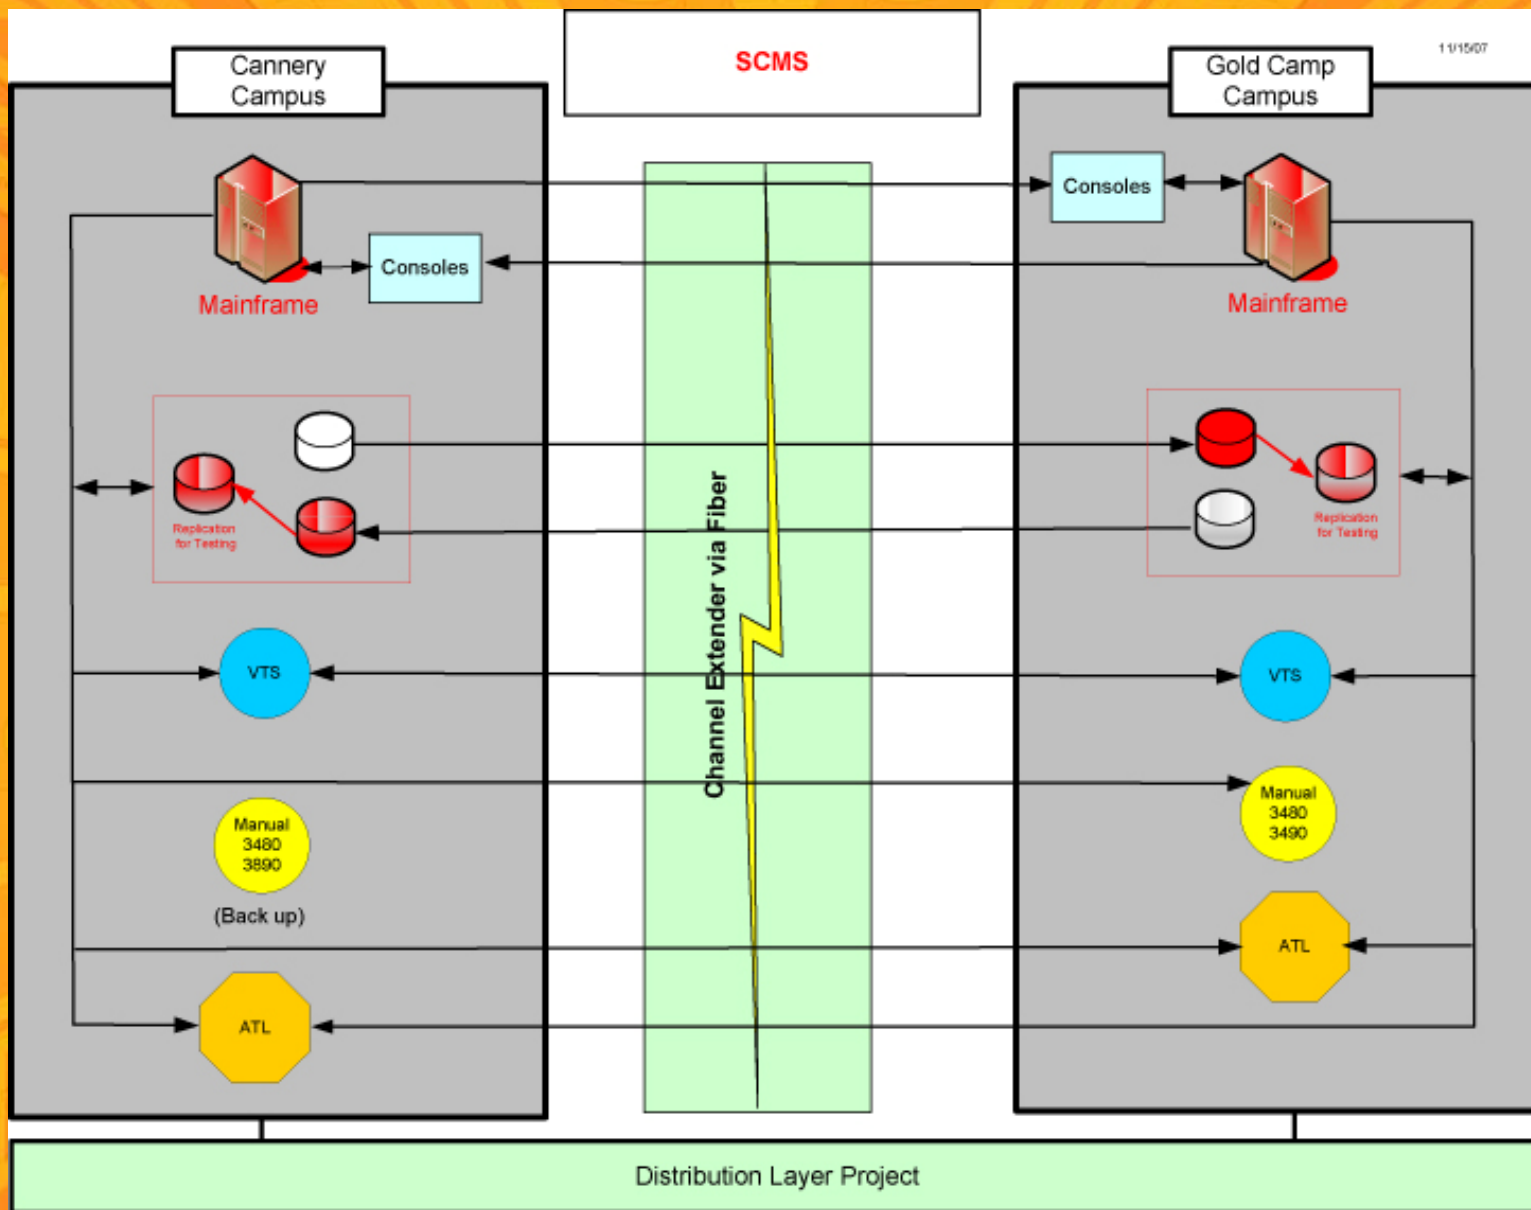

Thank you for your help with
the final hurdles!
